About the Course
This course is designed to give primary care clinicians updates on the evaluation, management, and referral of common dermatological conditions.

Target Audience
Primary care clinicians and health care teams

Course Objectives
At the end of the conference, attendees will be able to:

- Discuss the diagnosis and management of common pediatric dermatology conditions, and recognize when to refer these patients to a specialist.

- Describe the benefits and challenges of using teledermatology and define how to utilize it in a clinical setting.

- Diagnose commonly seen conditions of hair loss, review diagnostic workup and treatment options.

- Incorporate into patient care the management principles for melanoma and non-melanoma skin cancers.

- Discuss dermatology diagnostic approaches and effective topical therapy treatment.

- Recognize the differences between acne and rosacea.

- Review a variety of medical dermatological cases that come up in everyday practice.
